Summary

I am a professional historian of the Middle Ages. From 2015-2019, I was a seminar tutor at Cardiff University, where I earned my doctorate.

Thanks to UPenn's Full Stack Web Development program, I am proficient in front-end and back-end web development, including JavaScript, jQuery, Node.js, and React.

My main interests include using digital techniques to ask new questions about the past, create new and exciting learning tools, and learn new skills along the way.

Experience

Researcher

Malbork Castle Museum / Muzeum Zamkowe w Malborku

Dec 2018 - Oct 2019 (11 months)

I was a member of the project team 'Steinskulptur in Preussen im Mittelalter' ('Stone Sculpture in Medieval Prussia'), based at the Malbork Castle Museum.

Our project sought to research and contextualize the developments of medieval sculpture in the region of Prussia (present-day Poland and Lithuania) during the Middle Ages.

My main responsibility was to catalogue and outline the historical evidence for medieval stone sculptures, and prepare a report.

Education

Cardiff University / Prifysgol Caerdydd

Doctor of Philosophy - PhD, History

2014 - 2018

Skills

Publishing • Geographic Information Systems (GIS) • University Teaching • Web Development • JavaScript • MERN Stack • Node.js • Quantum GIS
